OJI PAPER CO., LTD

4-7-5 Ginza
Chuo-ku, Tokyo 104-0061, JAPAN

To whom it may concern,

February 22, 2008

It has come to our attention that in the Australian market, where we export a range of our recycled grades, press articles, such as in Print21's on line journal of Wednesday, 6 February 2008, and the like are being misrepresentative and creating a market perception that recycled grades in general produced by Oji Paper contain false claims of recycled content.

We would like to take this opportunity, by reconfirming to our valued customers, the facts on the recycled grades exported to Australia. As per our issued letter of January 28, 2008, the recycled products that we currently export to the Australian market are produced in accordance within our stated manufacturing specifications being 100% recycled pulp, (pre and post consumer waste), these grades are;

Brand Name	Grade
"OK Kote N Green 100" (Re Art Gloss)	A2 coated gloss text
"OK Matte Kote Green 100" (Re Art Matt)	A2 coated matt text
"White A Card Green 100" (Re Art Gloss Cover)	A2 coated gloss cover
"Eco G 100" (Re Print)	Uncoated wood free

We sincerely appreciate your ongoing support of our products and we'll continue in our endeavour in delivering the best possible quality products to the Australian market.

Yours Sincerely,

A handwritten signature in black ink, appearing to read "H. Ohara", written over a horizontal line.
